Education

University of Southern California

Los Angeles, CA

Doctor of Philosophy

- Department and School: *Data Sciences and Operations, Marshall School of Business*
- Group: *Operations Management*

Summer 2030

University of Michigan

Ann Arbor, MI

Bachelor of Science

- Major: *Mathematics: Mathematical Sciences, Sub plan Probabilistic Methods*
- Major: *Honors Linguistics*

May 2025

May 2025

GPA: 3.95/4.00

Research Experience

- Project advised by **Aida Maraj** and **Alvaro Ribot** at Harvard University. Started June 2024. NSF Grant DMS2306672.
 - Main result: Inductive proof using toric fiber products to find a minimal set of halfspaces that characterizes shortest-path-polytopes over tree graphs, useful in algebraic statistics and graphical modeling.
- Project advised by **Andrew Daw** at the University of Southern California. Started July 2025. NSF Grant 2441387.
 - Topics: Stochastic point processes, convex polyhedra, time-transformation, service operations.
- Project advised by **Yeganeh Alimohammadi** at the University of Southern California. Started April 2026.
 - Topics: Formal Languages, Automatic Optimization Formulations, Large Language Models.

Papers

- ❖ Goel, A., Maraj, A., & Ribot, Á. (2024). *Halfspace Representations of Shortest Path Polytopes on Trees*. ms, Cambridge, MA. <https://arxiv.org/abs/2502.21204>
- ❖ Goel, A. (2025). *Simple and Periphrastic Past Tense Syntax in Catalan* (thesis). (N. Abner, Ed.).

Presentations, Talks, & Posters

On the Cluster Duration Distribution of the Markovian Hawkes Process

- ❖ Southern California OR/OM Day (May 2026), Poster
- ❖ Stochastic Networks Conference (June 2026), Poster, **Outstanding Student Poster Award**
- ❖ 2026 Informs Annual Meeting, (November 2026) Talk

Halfspace Representations of Path Polytopes of Trees

- ❖ 2025 Joint Mathematics Meetings (January 2025), Poster
- ❖ Gulf Coast Undergraduate Research Seminar (November 2024), Talk **Outstanding Session Presentation, Computational Applied Mathematics and Operations Research**

Skills

- *Computational*: Basic proficiency in Java, C++, proficiency in LaTeX, Python, SageMath, Excel, Powerpoint,
- *Mathematics*: Combinatorics, affine geometry, combinatorial geometry, graph theory, stochastic processes
- *Language*: Fluent: Spanish; Highly Proficient: Portuguese, Catalan; Basic Proficiency: Italian, French, Hindi, Urdu

Awards and Interests

- ❖ GCURS Outstanding Session Presentation, Computational Math and Operations Research
- ❖ University Highest Honors in Linguistics
- ❖ NSF Graduate Research Fellowship (Industrial Engineering and Operations Research)
- ❖ Outstanding Student Poster, Stochastic Networks Conference
- ❖ Cartography
- ❖ Billiards
- ❖ Baking & Cooking
- ❖ Art & Architecture
- ❖ [Poetry](#)

Professional Experience

The Blackstone Group

Quant Summer Analyst

New York City, NY

Summer 2023

- Performed several advanced statistical analyses on US equities and commodities markets, including a principal component analysis coupled with linear regressions to determine sources of return variance
- Researched the effect of algorithmic trading on the economics of the underlying commodity markets being traded – concluded that large-volume trading does not show statistically significant impact
- Implemented trend-following price momentum signals including random walks, integrated processes, significance signals, and others based on moving statistics calculated from time series

AlixPartners LLC

Risk Advisory Consulting Intern

Chicago, IL

Summer 2022

- Performed rigorous accounting analyses of international financial statements, including a 245-month discounted cash flow analysis, cost, revenue, and operations comparison analyses, and other comparison-based valuations to quantify economic damages for AlixPartners clients
- Analyzed 1000+ pages of Spanish-language international documents, including original arbitration contracts, equity contribution agreements, bidding agreements, and complex financial statements
- Managed, summarized, and visualized complex data for several disputes, including official and classified conflicts from a large energy cooperative and a multinational airport concessionaire

Undergraduate Leadership

Michigan Undergraduate Law Review

Editor-in-Chief

Ann Arbor, MI

January 2022-December 2024

- Used WestLaw, LexisNexis, Bloomberg Law, and academic journals in English, Spanish, and Portuguese to write and edit legal research pieces about statistical methodology in law and enforcing international treaty law
- Developed proprietary legal curriculum to educate writers and editors on academic standards, including Bluebook citation manual, legal theory, legal language and interpretation, and analytical court opinion readings
- Led journal of 50 staff members including a full-length law review, two teams of editors, and a blog product by reviewing legal pitches, editing content, managing editor relationships, and proofreading all published articles

The Michigan Daily

Research Reporter | Investigative Journalist

Ann Arbor, MI

December 2022-May 2025

- Investigated research and administrative topics in STEM, social science, and humanities by connecting with 30+ University of Michigan professors, researchers, academic writers, and student leaders
- Conducted official journalistic interviews with scientists, administrators, industry experts, and leaders of student organizations to report on cutting-edge academic and medical research conducted at the University of Michigan
- Investigated confidential university-related academic misconduct with a team of other investigative reporters using FOIA requests, trauma-informed reporting, and court documentation tools like PACER and MiCOURT

Michigan Journal of International Affairs

Head of Finance | Staff Writer

Ann Arbor, MI

September 2022-May 2024

- Researched current international affairs in Latin America, particularly from primary Spanish-language sources including local news, press releases, and official political correspondents
- Conducted independent investigations in econometrics, comparative law, and international policy to show how social factors like history, commerce, and language affect the current politics of the Western Hemisphere
- Directed the finances of the organization by budgeting for official club events, including social events, merchandising, and organizing logistics for club-sponsored bonding events

Michigan Journal of Economics

Vice President | Head of Research

Ann Arbor, MI

September 2021-May 2024

- Collaborated with peers to explore fringe topics in economics including behavioral economics, sports economics, and theory, using tools from mathematical modeling and game theory
- Lectured and developed a curriculum for economic research writing, teaching new writers how to interpret, interact with, and produce formal economic writing to prepare them for a complete supervised research project
- Led several workshops in professional development, including LinkedIn format, Resume and CV making, network development, and professional communication for members recruiting private-sector jobs
